AIMS & SCOPE

AJPM Focus is the official open access journal of the Association for Prevention Teaching and Research and the American College of Preventive Medicine. The **aim** of this journal is to serve as the academic open access repository for high-quality prevention evidence across the global spectrum of health. The journal's **scope** spans all aspects of public health and preventive medicine practice, teaching, and research, including: community medicine, community health, and global health; assessment, policy development, and assurance; health promotion, health protection, and disease prevention; population medicine, population health, and population health management, such as health systems and services delivery; and clinical preventive medicine, integrative medicine, and lifestyle medicine. Papers that interconnect or thoughtfully dissect topics within these foci are desirable.

Original papers, reviews, and editorials based on quantitative, qualitative, or mixed methodologies, including all experimental and observational designs, are welcomed. The journal also encourages the submission of other scholarly articles such as case studies; articles that report pilot data analyses and preliminary results; studies with null or negative results; replication studies; primary or secondary research protocols; program evaluations, quality improvement findings, and policy analyses; and implementation, translation, and synthesis science studies. Lastly, the journal publishes AJPM papers devoted to areas of interest to public health and preventive medicine when funders mandate publication in a fully open access journal.

AJPM Focus (ISSN: 2773-0654), an official Journal of the Association for Prevention Teaching and Research and the American College of Preventive Medicine, is published by Elsevier Inc., 230 Park Avenue, Suite 800, New York NY 10169-0901, USA.

Notice: Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds or experiments described herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made. To the fullest extent of the law, no responsibility is assumed by the publisher, the *American Journal of Preventive Medicine* Board of Governors, the Association for Prevention Teaching Research, or the American College of Preventive Medicine for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

Advertisements that appear in *AJPM Focus* must be approved by the Editorial Office prior to publication. Publication of an advertisement does not imply endorsement of the advertised products or services by the editors of *AJPM Focus*, the American Journal of Preventive Medicine Board of Governors, the Association for Prevention Teaching and Research, or the American College of Preventive Medicine.
